

ABSTRACT

A user commands a recording device (10) to store a recording (71) on a removable recording medium (70). The user selectively adds interactivity to the recording (70). In response to any added interactivity, the recording device (10) links the recording (71) and an interactive module (72) that is based on the added interactivity. The interactive module and an interactive link (73) representative of the link between the recording (71) are both stored on the removable recording medium (70).

(54) Title: METHOD FOR ADDING INTERACTIVITY TO A RECORDING

WO 2004/057608 A1

(57) Abstract: A user commands a recording device (10) to store a recording (70). The user selectively adds interactivity to the recording (70). In response to any added interactivity, the recording device (10) links the recording (70) and an interactive module (72) that is based on the added interactivity. A representative of the link between the recording (70) and the interactive module (72) is both stored with the recording (70) and the recording medium (70).

a removable recording medium (70). The recording device (10) links the recording (70) and an interactive module (72) that is based on the added interactivity. A representative of the link between the recording (70) and the recording medium (70).
